

Absorbent fabric Verona

Verona is a stretchy, absorbent fabric that we offer in natural white and black. This material absorbs liquids and prevents them from seeping through to the wrong side of the fabric thanks to the waterproof layer. At the same time, Verona feels pleasantly soft and is totally unobtrusive. The absorbent, liquid-absorbing fabric made of 70% viscose (bamboo) and 30% cotton with a PUL layer is washable at 60 degrees.

(PUL = polyurethane laminate, a thin, water-repellent layer that is laminated onto the fabric)

So versatile!

Covers of all kinds: car seats, child seats, cushion covers, mattress protectors and bed covers

Baby & children: Changing mats, nursing pads, bibs, burp cloths, pillows, mattress protectors, underpants for potty training

Pets: dog heat pants, dog baskets, as pet blanket / sofa protection

Bath mats - also ideal as a mobile doormat for the swimming pool cabin

Individual protection!

(light to medium fluid absorption, as additional protection in the event of heavy fluid loss):

- For **incontinence** as a bed pad / mattress protector or insert
- For **mild bladder weakness**, e.g. after childbirth or during sport
- **Menstrual underwear**
- **Sweat protection pad** for clothing for hyperhidrosis

Reusable pads are discreet, sustainable and can be worn every day if necessary.

Absorbent fabric Verona for period underwear

Verona is very suitable for period underwear, among other things. Menstrual briefs and self-sewn pads are becoming increasingly popular. On light days or when bleeding is light, period underwear can serve as the sole protection as an alternative to disposable products such as pads, tampons or panty liners.

Many girls and women like to use them as additional protection to conventional products or a menstrual cup. So practical: with Absorber fabric by the metre, you can use tried-and-tested patterns and adapt the gusset to your individual cut, needs and size. We have had "period panties" tested with our Verona absorbent fabric and received very good feedback.
